SUSTAINABLE FOOTSTEPS TOWARDS A HEALTHIER TOMORROW

FRP Modular Toilets

**NEW MATERIALS
BUSINESS**
An Initiative of Tata Steel

An addition to the world of innovative and sustainable solutions from New Materials Business

Tata Steel's New Materials Business (NMB) has introduced **Fibre Reinforced Polymer (FRP) Modular Toilets** which are known for their aesthetic appearance, easy installation and longer life.

These provide a spectrum of benefits including outstanding durability and styling aesthetics, backed by excellent corrosion resistance.

- Lightweight and portable, FRP modular toilets are prefabricated and ready for quick installation
- Our modular toilets are available in customisable options, along with a wide range of designs and colours, making them the preferred choice for customers

Ultra Durable

- Long maintenance-free service life
- Fully resistant to corrosion and UV protected - therefore, ideally suited for outdoor installations, especially in coastal areas and industrial environments

Lightweight

- Four times lighter than steel
- Easy and affordable to transport
- Simple and quick installation

Standard and Customised Designs

- FRP Modular Toilets are available in standard designs with standard fittings and optional accessories (such as an overhead water tank)
- Customised solutions can be developed on a priority basis

Prefabricated and Modular

Minimum Maintenance
