

## RAIL COACH FURNISHING

**NEW MATERIALS  
BUSINESS**  
An Initiative of **Tata Steel**

# A LEGACY OF TRUST

The world of Tata Steel is one without boundaries. One that embraces different skills, continuous innovation, sustainable growth and a better quality of life.

Throughout history, materials and advances in material technology have influenced civilization. Now we just might be on the verge of the next shift in advanced materials, enabling products and functions we never believed possible.

## Harnessing the Power of Innovation

New Materials Business (NMB) is one of the youngest businesses of Tata Steel and was set up with the vision of partially insulating the vulnerability of revenues from the cyclicity of the steel business, and in response to the growing demands for alternative materials.

# INTERIORS BUILT TO LAST

Tata steel is offering complete turnkey furnishing of Coaches of Indian Railways.

We provide FRP Interior furnishing for all variants of LHB Coaches including:

Side Panels

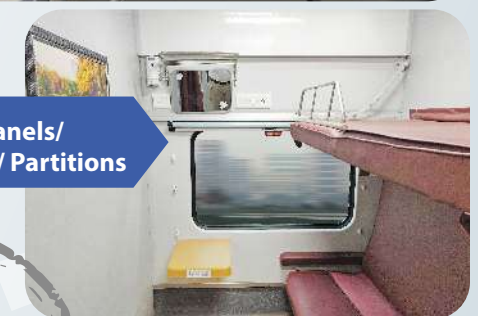

Roof Ceilings  
AC Troughs

Our furnishing includes all modern passenger amenities like proper design of emergency exits, AC vents, power saving lighting, luggage racks, individual charging facilities, public address system, instructions in Braille system for visually impaired etc.

Interior Panels/  
Windows / Partitions

Modular Toilets

Seats for Coaches

# OUR TURNKEY FURNISHING SOLUTIONS

# OUR SUCCESS STORY

There are no borders in the Tata Steel world.

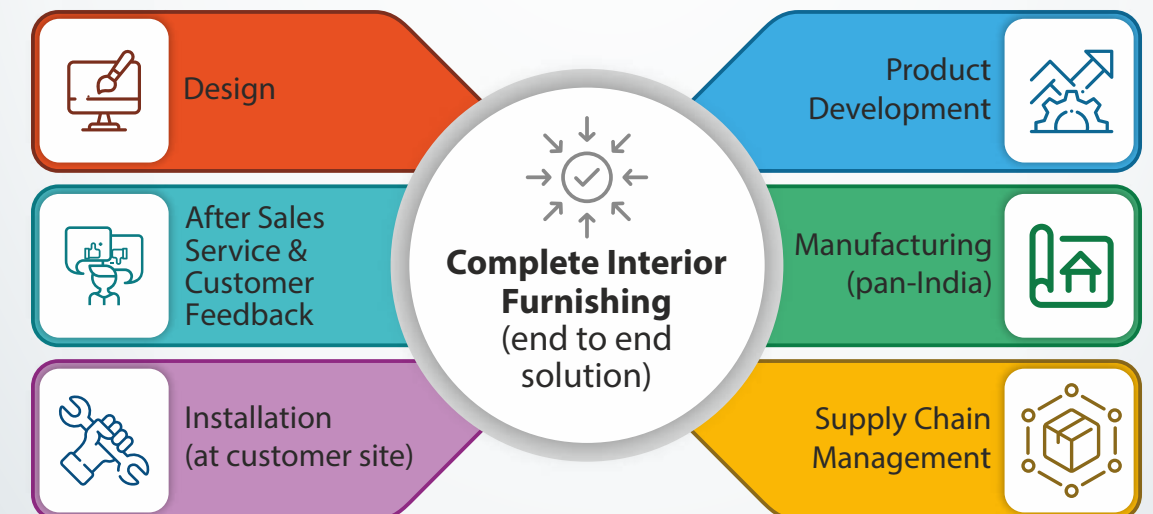

Tata Steel's Composites Business has achieved a significant milestone by receiving a bulk order for the supply and installation of full seating systems and interior panels for the **Vande Bharat Express**.

This order reflects Tata Steel's ongoing efforts to achieve excellence and provide high-end products to its customers.

## OUR VISION

NMB's vision is to provide complete furnishing solutions for the Indian Railways, leveraging their state-of-the-art R&D facilities and transnational collaborations; addressing all prerequisites of international standards and design through world-class manufacturing facilities at various locations.
